COMMENTS FROM THE TOWN MANAGER'S OFFICE

We have used the new snow blower to remove snow from the streets and found, except for the usual difficulties of operating a new machine it should do a very good job of picking up the snow The crew experienced trouble with large pieces of ice that caused the machine to break shear pins. This should not be a problem when the snow is dry or it is removed before it freezes.

Tax collections for 1967 are some below normal as could be expected because the bills were not sent until the first week of November. This situation should be corrected next year as the revaluation has prevented us from having the figures to work with until late in the summer. It is not expected there will be very many changes in valuation for
